

Cathy Rose, a native Californian, grew up at the base of the San Gabriel Mountains, graduated from UC Berkeley, and taught middle school English in Santa Barbara for 28 years. Her interest in botany began in the 1960s in Yosemite when she met legendary Ranger-Naturalist, Carl Sharsmith. Cathy has led field trips in the deserts, coasts, and mountains of California, and for 15 summers, guided botanical walks in the Tuolumne-Tioga Pass area for the National Park Service. Cathy wrote *Rock Creek Wildflowers* (CNPS, 2015) and the majority of the plant profiles in *Bristlecone Forest Wildflowers*.

Karen Ferrell-Ingram, raised in Bishop, received her BA degree in English from California State University, Chico. After years of teaching tennis and growing orchids commercially, she co-founded the native plant propagation center in Bishop and worked in native plant restoration. Karen was co-founder and former executive director of Eastern Sierra Land Trust. She continues her involvement in land conservation and stewardship as vice-chair of the Land Trust Accreditation Commission. Karen wrote some of the profiles, and helped plan, edit, and organize *Bristlecone Forest Wildflowers*.

Stephen Ingram, born and raised in southern California, received a BS degree in Biology from Lewis and Clark College, and an MS degree in Botany from UC Santa Barbara. He is a past president of the Bristlecone Chapter of CNPS. Stephen's photographs have been published in many books, calendars, and periodicals; he is the author and photographer of *Cacti, Agaves, and Yuccas of California and Nevada* (Cachuma Press, 2008), and photographer for *Rock Creek Wildflowers* (CNPS, 2015).
